Department of the Army Headquarters United States Army Medical Department Activity 2480 Llewellyn Avenue Fort George G. Meade, Maryland 20755-5800 30 May 2001

* MEDDAC Regulation 600-8-2

Personnel – General

Competency-based Orientation (CBO)

FOR THE COMMANDER:

JEROME PENNER III LTC, MS Deputy Commander for Administration

Official:

JOHN SCHNEIDER

Adjutant

History. This is the first update of this regulation.

Summary. This regulation prescribes a means for building a documented source of information to indicate the competency or need for training for U.S. Army Medical Department Activity, Fort George G. Meade (MEDDAC) personnel.

Applicability. This regulation applies to the MEDDAC headquarters and all outlying clinics. Specifically, this regulation applies to all MEDDAC employees. (The term "employees" is explained in the glossary.)

Proponent. The proponent of this regulation is the Deputy Commander for Nursing.

Suggested improvements. Users of this publication are invited to send comments and suggested improvements, by memorandum, directly to the Commander, U.S. Army Medical Department Activity, ATTN: MCXR-ZN, Fort George G. Meade, MD 20755-5800, or to the MEDDAC's Command Editor by fax to (301) 677-8088 or e-mail to john.schneider@na.amedd.army.mil.

Distribution. Distribution of this publication by electronic medium only.

^{*} This update supersedes MEDDAC Regulation 600-8-2, dated 13 May 1998, and rescinds MEDDAC (Ft Meade) Form 677-R, dated 1 May 1998, and MEDDAC (Ft Meade) Form 678-R, dated 1 May 1998.

Chapter 1 Introduction

1-1. Purpose

This regulation prescribes the policies, procedures and responsibilities to establish and maintain a documented source of information that indicates the competency or need for training for MEDDAC personnel.

1-2. Explanation of abbreviations and terms

Abbreviations and special terms used in this regulation are explained in the glossary.

1-3. References

Prescribed forms are listed at appendix A.

1-4. Responsibilities

- a. *The MEDDAC Commander*. The MEDDAC Commander will ensure a competent staff is available to meet the mission.
- b. *The Deputy Commander for Clinical Services (DCCS)*. The DCCS will evaluate the competency of the medical provider staff.
 - c. The Deputy Commander for Nursing (DCN). The DCN—
- (1) Will ensure and evaluate the competency of the nursing staff and the administrative support staff working under the direction of nursing personnel.
 - (2) Is the proponent for the MEDDAC's CBO Program.
- d. *The Deputy Commander for Administration (DCA)*. The DCA will ensure and evaluate the competency of the administrative staff, excluding those subordinate to Nursing Services.
- e. *Commanders, directors and chiefs of outlying clinics*. Commanders, directors and chiefs of outlying clinics will comply with the provisions of this regulation.
- f. Department supervisors, clinic chiefs, head nurses, and or noncommissioned officers in charge (NCOICs). Department supervisors, clinic chiefs, head nurses and NCOICs will maintain a current CBO folder for each of their personnel and will report their section's competence level to

the command on an annual basis.

g. *Employees*. Employees will provide their supervisors with all pertinent information needed to complete their individual CBO folders. Employees will ensure that they know where their CBO folders are located, what is contained in them, and assist their supervisors in their maintenance.

Chapter 2

The CBO Folder, MEDDAC Form 674-R, Personnel Data Sheet, Signature Verification Sheet, and General Maintenance of the CBO Folder

2-1. The CBO folder

The CBO folder contains six sections. Each section contains specific items of documentation and information as described below in table 2-1. Supervisors of credentialed providers maintain sections I through IV and VI. Information in initial and ongoing competencies concerning credentialed providers will be maintained in their files in the Credentials Office.

Table 2 Section	-1 as and content of the CBO folder	
Section	Section Title	Contents
I	Personnel Data	a. MEDDAC Form 675-R b. MEDDAC Form 719-R c. MEDDAC FL 200-R d. Copy of license verification (if applicable) e. Copy of BLS and ACLS card (if applicable) f. Copy of resume or curriculum vitae
II	Duty / Position Description	a. Duty description for officers and enlisted personnelb. FASCLASS position description for DA civiliansc. Statement of Work for contract employees
Ш	Facility Orientation	MEDDAC Form 676-R
IV	Initial Unit Orientation and Initial Competency Assessment	See paragraph 2-6, below.
V	Ongoing Competency Assessment	See paragraph 2-7, below.
VI	Continuing Education	MEDDAC Form 679-R

2-2. MEDDAC Form 675-R, Personnel Data Sheet

Supervisors will use MEDDAC Form 675-R (Personnel Data Sheet) to record the attainment of training and other items as listed. The employee will enter the date and his/her initials upon the completion of any item listed on the form and the supervisor will initial once verified. This form is reproducible and is contained in the –R Forms section at the back of this regulation. Supervisors may reproduce copies of the form as needed; do not requisition copies through forms supply channels.

2-3. MEDDAC Form 719-R, Signature Verification Sheet

Supervisors will have all eligible staff who are authorized to initial new employees CBOs; i.e., an employee's supervisor, HN, NCOIC and preceptor, complete MEDDAC Form 719-R (Signature Verification Sheet). This form is reproducible and is contained in the –R Forms section at the back of this regulation. Supervisors may reproduce copies of the form as needed; do not requisition copies

through forms supply channels.

2-4. MEDDAC Form Letter (FL) 200-R, Patient Confidentiality Acknowledgment Statement MEDDAC FL 200-R (Patient Confidentiality Acknowledgment Statement) will be initiated and maintained in accordance with MEDDAC Policy Statement No. 15, which may be accessed from the Electronic Publications section of the MEDDAC's web site. The form may be reproduced from the copy at the back of the policy statement or from the copy contained in the –R Forms section at the back of this regulation. Supervisors may reproduce copies of the form as needed; do not requisition copies through forms supply channels.

2-5. MEDDAC Form 676-R, Competency-based Orientation – Facility Orientation

- a. MEDDAC Form 676-R (Competency-based Orientation Facility Orientation) lists certain skills and abilities that are generally applicable to employees throughout the organization. The form will be completed during new employee orientation, which all employees must attend within 30 days of arrival. An interim orientation addressing key items, such as fire safety, will be conducted by the respective supervisor if the facility orientation is not scheduled within the employee's first two weeks. This will be documented on MEDDAC Form 676-R, which will be completed not later than two weeks after arrival and prior to assumption of any duties.
- b. This form is reproducible and is contained in the -R Forms section at the back of this regulation. Supervisors will reproduce copies as needed; do not requisition through forms supply channels.
- c. Supervisors will issue a copy of this form to each employee supervised and maintain a record copy on file in each employee's CBO folder.

2-6. Competency-based Orientation – Initial Unit Orientation and Competency Assessment

- a. The Initial Unit Orientation and Competency Assessment CBO will identify all of the tasks that an employee must know and demonstrate to work in that unit. In addition to the skills and tasks, all pieces of medical equipment that an employee would be required to use will be listed. Age specific competencies and critical thinking skills should also be incorporated throughout the document.
- b. Since each section must have a version of this form that is specifically tailored to the unit, there is no official MEDDAC Form associated with the Initial Unit Orientation and Competency Assessment CBO. Instead, two example formats for the Initial Unit Orientation and Competency Assessment CBO form are at appendixes B and C.
- c. Each unit is responsible for creating a Initial Unit Orientation and Competency Assessment form based on the examples in appendixes B and C, using existing regulations or practice guidelines pertinent to their clinical or administrative area.
- (1) The first column lists the knowledge and skills specific to that unit. If possible, these are grouped by major category as shown in the example.
- (2) The second column is a self assessment complet ed by the new employee. The supervisor uses this information to help tailor the orientation program.
- (3) The third column is used by the preceptor to annotate when the new employee was oriented to a task or skill.
- (4) The fourth column annotates the method used by the supervisor to verify the employee's competence to perform that skill or task. Each unit is responsible for identifying those

procedures and or tasks that require demonstration to verify competency. This is annotated with a "D" for demonstration.

- (5) The supervisor signs and dates the fifth column once competency has been assessed and verified. By doing so, the supervisor has verified that the employee is competent to perform this task without supervision.
- (6) The final column addresses comments and can be used by both the preceptor and supervisor. Comments may include notes that this task was performed in a skills lab setting or that the employee requires additional practice before verifying competency, or similar notes. This section may also be used to annotate restrictions; e.g., a skill that requires certification, or note that the employee did not have an opportunity to perform or demonstrate that skill during the orientation process; e.g., administering the rabies vaccine.
- d. Department chiefs, or supervisors if delegated, will initiate the CBO folder and issue the new employee a Initial Unit Orientation and Competency Assessment CBO checklist to use during his or her orientation program. Completion of the CBO checklist is a joint effort between the employee, the preceptor and the supervisor. The completed Initial Unit Orientation and Competency Assessment CBO checklist will be maintained in the employee's CBO folder.
- e. Supervisors are responsible for establishing a time frame to complete Initial Unit Orientation and Competency Assessment orientation. Established time frames are to be used as guidelines and may be subject to change at the discretion of the supervisor depending on the learning needs of the new employee.
- f. The supervisor will prepare and sign a memorandum for record stating that the employee has successfully completed initial orientation. An employee who rotates to another area; e.g., to Laboratory Service or Telephone Triage, must have a separate memorandum for each identified area.

2-7. Ongoing competency assessment

- a. Every supervisor will reassess and validate the competency of their established employees during the year and on an annual basis using a format similar to the sample in appendix D. The super-visor may use a variety of methods; i.e., verbal, observation of daily practice, demonstration, or via skills labs or a recertification class, to validate the competency of the staff.
- b. Ongoing competencies will reflect the changing nature of the job in light of organization mission and goals. These are based on new initiatives, procedures, technologies, policies or practices; changes in procedures, technologies, policies or practices; high risk job functions or accountabilities; problem prone areas identified by performance improvement data, patient surveys, staff surveys, incident reports, or any other formal or informal evaluation processes. The ongoing competency checklist is completed in the same manner as the orientation CBO checklist as per the steps noted in paragraph 2-6c, above, and has room to write in new required competencies as they are identified.
- c. Each unit is responsible for creating a Initial Unit Orientation and Competency Assessment form that is based on the example in appendix D.
- d. The ongoing competency assessment checklist is maintained in the six-part CBO folder. Employees assigned prior to the implementation of this format will keep ALL prior CBO formats in their CBO folder and will use the ongoing competency assessment form from this point on.

2-8. MEDDAC Form 679-R, Competency-based Orientation – Continuing Education/ Inservice Record

- a. MEDDAC Form 679-R (Competency-based Orientation Continuing Education/Inservice Record) will be used to record all continuing education, inservices, military and education inservices.
- b. This form is reproducible and is contained in the -R Forms section at the back of this regulation. Supervisors will reproduce copies of the form as they need them; do not requisition copies through forms supply channels.

2-9. General maintenance of the CBO file

- a. All entries made in the CBO file will be in ink or typewritten.
- b. Any time a formal review of skills is undertaken, a written assessment of the needs, recommendations and or remedial training, and outcome will be documented and maintained in the employee's CBO.

Chapter 3

Implementation of the CBO Program and the Competency-based Assessment Evaluation Process

3-1. Implementation of the CBO Program is as follows

- a. The department chief or supervisor, if delegated, will initiate the CBO folder for all new employees.
- b. All new employees will attend facility orientation within 30 days of arrival and complete the Facility Orientation Checklist. An interim orientation addressing key items, such as fire safety, will be conducted by the respective supervisor if the facility orientation is not scheduled within the em-ployee's first two weeks. This will be documented on MEDDAC Form 676-R, which will be com-pleted not later than two weeks after arrival and prior to assumption of any duties.
- c. Orientation to a specific unit will be do cumented in a format similar to the one provided in appendix B, which will be completed in conjunction with the immediate supervisor.
- d. Except for credentialed providers, all new employees will undergo an initial competency assessment orientation at the unit level and follow the process outlined in paragraph 2-6, above.
- e. New employees are encouraged to provide their supervisors with documentation of previous training courses, certifications, continuing education classes, etc., that can be added to Section VI of the CBO folder. This provides the supervisor with a historical perspective of the new employee's previous training record.
- f. New employees who have completed certification programs at other locations; e.g., suture certification, and want to continue performing those skills, will provide their supervisors with all doc-umentation of training. This information will then be routed to the respective department chief or deputy commander for review and consideration. The employees will be informed if the certification is accepted for transfer or if they must demonstrate or attend the facility's certification course.
- g. The supervisor will sign a memorandum to signify that the employee has successfully completed initial orientation and that all identified skills are validated. An action plan will also be identified for those low volume procedures or skills, such as administering rabies vaccine, that the employee did not complete during initial orientation due to lack of opportunity. The supervisor will

design a plan of action to rectify this situation and then annotate after the skill has been verified. An example of this format is at appendix E.

- h. All CBO folders will be maintained by the supervisor and will be available to both the super-visor and employee for updating and maintenance. It is a joint responsibility of the supervisor and the employee to ensure that the CBO folder is up to date and ready for inspection at any time.
- i. Supervisors are authorized and encouraged to conduct formal and informal needs assessments and reverification of skills at any time as well as during employees' annual performance appraisals. The Ongoing Competency Assessment Checklist will be initiated during this time and new skills and learning needs identified that reflect the changing nature of the job.

3-2. Monitors and Indicators

- a. At any time, the immediate supervisor has the right to prohibit unsupervised performance of a skill or task pending full review. If retraining is deemed necessary, the supervisor will make arrangements to initiate a reorientation or skills training program. All initiatives and results will be thoroughly documented and the employee will operate under supervision until the supervisor validates competency.
- b. An employee who fails initial orientation, retraining and or reorientation process and is unable to fulfill the duties of his or her position description may be subject to administrative action.

Deputy Commander for Administration

DCCS

Deputy Commander for Clinical Services

DCN

Deputy Commander for Nursing

HN

head nurse

MEDDAC

U.S. Army Medical Department Activity, Fort George G. Meade

NCOIC

noncommissioned officer in charge

PTM&S

Plans, Training, Mobilization and Security Division

Section II Terms

Certification

A formal process by which clinical personnel are authorized to perform certain skills which are beyond the individual's formal training or represent high risk to life or limb. Certification requires a specified educational program, documentation of attendance, and competency verification.

Competency

The effective application of those technical skills and knowledge that the individual must possess in order to perform their duties. Competency communicates an acceptable level of practice and may be evaluated using a variety of methods.

Competency assessment

A fluid and ongoing process that articulates and evaluates the skills needed to carry out a particular job now and in the future. It should reflect the dynamic nature of the job and help work groups focus on the philosophy and mission of the organization.

Competency-based orientation (CBO)

A structure which is implemented and provides the mechanism to evaluate the knowledge and ability of the individual to perform tasks identified in the scope of practice for a particular clinical or administrative environment. The CBO Checklist delineates the competency skills that must be demonstrated prior to unsupervised practice. The level of skill

requiring competency-based documentation is dependent on the risk involved and the educational preparation of the individual.

Competency verification

The process by which a responsible individual measures the abilities of an individual for a specific competency statement. Verification can and should take many forms within the overall competency process. A single method of verification can never effectively capture the technical, critical thinking, and interpersonal skills required to successfully perform the job. Therefore a variety of methods should be used to assess competency. Competency verification methods include but are not limited to observation, post-tests, return demonstrations, case studies, exemplars, peer review, self-assessment, discussion groups, presentation, mock events, and performance improvement monitors and observation that the individual is able to perform a particular task.

Initial competencies

Competencies that focus on the knowledge, skills, and abilities required in the first six months to one year of employment. These competencies are often referred to as the "core competencies" required to perform

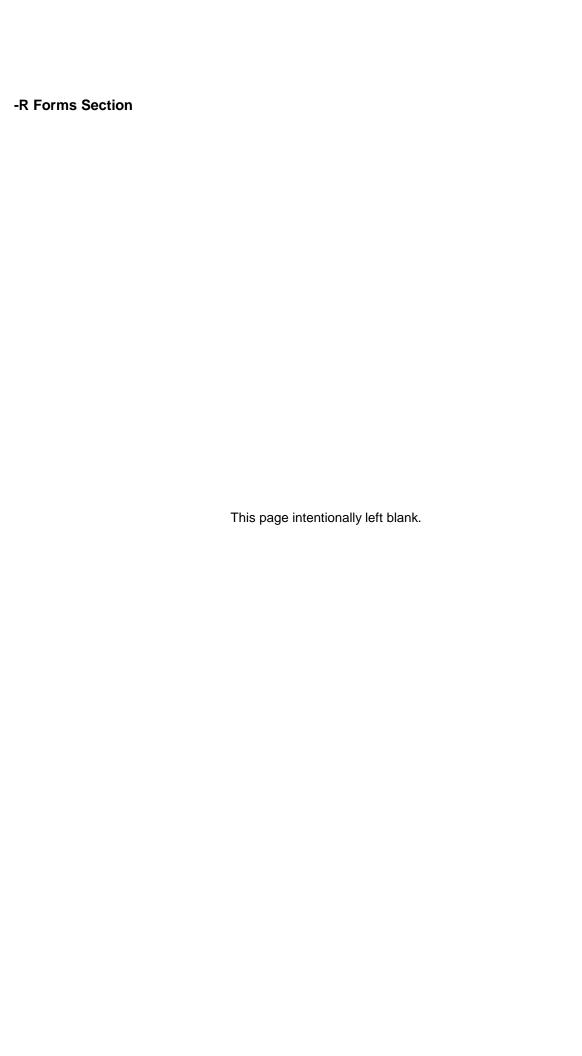

the job.

Ongoing competencies

Competencies that build on already established knowledge, skills, and abilities. These competencies reflect new, changing, high-risk, and problematic aspects of the job as it evolves overtime.

Scope of practice

The documented delineation of those tasks and functions which non-credentialed clinical and administrative personnel are authorized to perform in a designated environment following successful completion of competency-based orientation. The delineation of tasks and functions for credentialed providers is the responsibility of the Credentials Review Committee and is based on formal education, licensure and board certification.
